

HTML - Text Formatting

1. `<b>` - Bold Text

- **Description:** Makes text bold without implying any extra importance.
- **Example:**

```
<p>This is <b>bold</b> text.</p>
```

2. `<strong>` - Important Text

- **Description:** Indicates that the text is of strong importance. Browsers typically render it as bold.
- **Example:**

```
<p>This is <strong>important</strong> text.</p>
```

3. `<i>` - Italic Text

- **Description:** Makes text italic, often used for technical terms, phrases, or thoughts.
- **Example:**

```
<p>This is <i>italic</i> text.</p>
```

4. `<em>` - Emphasized Text

- **Description:** Indicates emphasis. Browsers typically render it as italic.
- **Example:**

```
<p>This is <em>emphasized</em> text.</p>
```

5. `<mark>` - Marked/Highlighted Text

- **Description:** Highlights text, similar to using a marker pen.
- **Example:**

```
<p>This is <mark>highlighted</mark> text.</p>
```

6. `<small>` - Smaller Text

- **Description:** Reduces the size of the text, often used for disclaimers or fine print.
- **Example:**

```
<p>This is <small>smaller</small> text.</p>
```

7. `<del>` - Deleted Text

- **Description:** Represents text that has been deleted or removed. Browsers typically render it with a strikethrough.
- **Example:** deleted

```
<p>This is <del>deleted</del> text.</p>
```

8. `<ins>` - Inserted Text

- **Description:** Represents text that has been added or inserted. Browsers typically render it with an underline.
- **Example:**

```
<p>This is <ins>inserted</ins> text.</p>
```

9. `<sub>` - Subscript Text

- **Description:** Displays text as subscript, often used for chemical formulas or mathematical expressions.
- **Example:**

```
<p>This is <sub>subscript</sub> text.</p>
```

10. `<sup>` - Superscript Text

- **Description:** Displays text as superscript, often used for footnotes or exponents.
- **Example:**

```
<p>This is <sup>superscript</sup> text.</p>
```
